**23' 10"**

MAXIMUM WIDTH

Residential & commercial spans

**6'**

MAXIMUM PROJECTION

Custom projections available

**100+**

FINISH OPTIONS

Powder coat + wood grain sublimation

The Cantilever Series Canopy System delivers a clean, post and arm-free overhead shelter by mounting entirely to the building wall with concealed structural brackets — no columns, no front posts, no obstructions below. The result is an uninterrupted walkway, drive-through, or entry point beneath a sleek aluminum canopy that appears to float off the face of the building. Fabricated from heavy-duty extruded aluminum with an integrated drainage system, the Cantilever Series is engineered for curb appeal and long-term performance on residential entries, storefronts, loading docks, and commercial facades.

## KEY FEATURES

### No Front Posts Or Arms Required

Concealed wall-mount brackets carry the full load — zero visible columns below

### Integrated Drainage System

Channels rainwater away from walls and entry points via built-in scupper or downspout

### Custom Sizes Available

Width and projection built to your exact requirements — not limited to catalog dimensions

### Extruded Aluminum Construction

Heavy-duty, rust-resistant aluminum — powder coated inside and out for lasting protection

### Welded or Knock-Down Kits

Fully assembled for rapid install, or knock-down kits for efficient freight and field assembly

### Wood Grain Sublimation Finish

In-house upgrade for a warm, natural appearance on any aluminum canopy profile

## SPECIFICATIONS

- Widths: 4' through 23' 10"
- Projections: 2' through 6'
- Support: Concealed wall-mount brackets
- Posts: None — fully post and arm-free design
