MAXIMUM WIDTH

Residential & commercial spans

6'

MAXIMUM PROJECTION

2' through 6' standard

100+

FINISH OPTIONS

Powder coat + wood grain sublimation

The G Series Architectural G-Gutter Canopy System is a sleek, durable solution for protecting garage doors, storefronts, service entries, loading docks, warehouses, and fulfillment centers. Fabricated from architectural-grade extruded aluminum — not the flimsy roll-formed metal found in low-end canopies — every G Series unit delivers maximum strength, rigidity, and long-term value. The integrated G-Gutter system channels rainwater away from doors and building walls, keeping entry points clean and dry. Available as welded fully assembled units for rapid installation, or knock-down kits for ease of shipping and field assembly.

KEY FEATURES

Extruded Aluminum Construction

Heavy-duty, rust-free, powder coated inside and out — not roll-formed sheet metal

4 Custom Fascia Heights

6", 8", 10", or 12" profiles for a tailored architectural look

Multiple Bracket Arm Styles

Choose from a variety of support arms to fit rustic or refined architectural themes

Integrated G-Gutter Drainage

Channels rainwater away from doors and walls for cleaner, drier entry points

Welded or Knock-Down Kits

Fully assembled for fast install, or knock-down for efficient freight and field assembly

Wood Grain Sublimation Finish

In-house upgrade for a warm, natural appearance on any aluminum profile
