Solution-dyed acrylic

Multi

UNIT LINKING

Continuous large-area coverage

The Shademaker Hercules™ Series is engineered for maximum coverage — delivering some of the largest retractable awning capabilities available. Built for large residential patios, restaurants, hospitality environments, and commercial projects where standard systems fall short, Hercules™ combines reinforced heavy-duty aluminum construction with a precision arm system designed for increased load capacity and extended projections. The heavy-duty torsion bar minimizes deflection across wider spans for consistent fabric tension under demanding conditions.

KEY FEATURES

Reinforced Frame Construction

Enhanced structural strength for wider spans and deeper projections

Heavy-Duty Torsion Bar

Minimizes deflection, maximizes stability across all span sizes

Multi-Unit Linking Systems

Link multiple units for continuous uninterrupted large-area coverage

Hercules Arm System™

Reinforced sealed bearing arms — consistent tension under heavy load

High-Torque Somfy® Motor

Built for larger awnings — smooth, reliable operation under full load

Wind & Sun Sensors Available

Automatic retraction protection for high-demand environments

SPECIFICATIONS

- Widths: 17' – 40'
- Projections: 14'-9" or 16'-6"
- Frame: Reinforced heavy-duty aluminum
- Arms: Hercules Arm System™
- Torsion: Heavy-duty stability bar
- Motor: High-torque Somfy® standard
- Sensors: Wind & sun (optional)
- Linking: Multi-unit systems available
- Upgrade: Hercules Night Series™ LED

IDEAL APPLICATIONS

- > Large residential patios & lanais
- > Restaurants & outdoor dining
- > Hospitality & resort environments
- > Commercial & multi-unit projects
