FINISH OPTIONS
Powder coat + wood grain sublimation

The O Series Standing Seam Awning combines architectural appeal with all-weather performance — delivering clean vertical lines, a watertight profile, and a premium finish that elevates both residential and commercial facades. Featuring Galvalume interlocking roof panels and a fully powder-coated aluminum frame, this system is built to withstand harsh environments while protecting windows, doors, patios, and storefronts. Every panel, bracket, and mounting component is powder coated on the top and underside for full protection and a polished appearance from every angle.

KEY FEATURES

- **Galvalume Standing Seam Panels**
High-strength steel with aluminum-zinc coating for superior corrosion resistance and clean architectural lines
- **Full Top & Underside Finish**
Panels, framework, and mounting brackets all finished for complete protection from every angle
- **Flat or Pitched Configurations**
Available in level and sloped designs to match your building elevation and architectural style
- **Powder-Coated Aluminum Framework**
All structural arms and support components are rust-proof aluminum, powder coated inside and out
- **Integrated Flashing System**
Built-in flashing at all roof-to-wall connections prevents water intrusion and ensures a watertight seal
- **Wood Grain Sublimation Available**
In-house sublimation applies realistic wood grain directly to Galvalume panels.

O SERIES FINISH & CONFIGURATION UPGRADES

The O Series pairs seamlessly with 1800Awnings' ArchEx USA wood grain sublimation finishing — applied in-house directly to the Galvalume roof panels for the natural warmth of wood with zero maintenance. Ideal for modern and rustic-inspired projects alike. Ask about custom fascia heights, panel widths, pitched configurations, and multi-bay installations.
