4' - 23' 10" standard widths

Closed

END PANELS

Fully enclosed sides

5'

MAXIMUM PROJECTION

Flat or pitched configurations

100+

FINISH OPTIONS

Powder coat + wood grain sublimation

The S Series Standing Seam Awning delivers all the performance and architectural strength of Galvalume standing seam construction — with fully enclosed end panels for a polished, finished appearance from every angle. Where the O Series features open ends for a lighter look, the S Series closes them off completely, giving the awning a more solid, built-in presence that reads as a permanent architectural feature. Featuring Galvalume interlocking roof panels, a fully powder-coated aluminum frame, and an integrated flashing system, the S Series is built for harsh environments and demanding facades.

KEY FEATURES

■ Closed End Panels

Fully enclosed sides create a solid, architectural appearance — finished and refined from every angle

■ Powder-Coated Aluminum Framework

All structural arms and support components are rust-proof aluminum, powder coated inside and out

■ Integrated Flashing System

Built-in flashing at all roof-to-wall connections prevents water intrusion and ensures a watertight seal

■ Galvalume Standing Seam Panels

High-strength steel with aluminum-zinc coating for superior corrosion resistance and clean vertical lines

■ Full Top & Underside Finish

Panels, framework, and mounting brackets finished top and underside for complete all-angle protection

■ Wood Grain Sublimation Available

In-house sublimation applies realistic wood grain directly to Galvalume panels — zero maintenance

SPECIFICATIONS

- Widths: 4' through 23' 10"
- End panels: Fully closed — enclosed sides
- Height: 4' - 5' standard
- Projection: 4' - 5' standard
- Panels: Galvalume interlocking standing seam
