FABRIC OPTIONS

Solution-dyed acrylic fabrics

Sunflexx® is the most state-of-the-art retractable awning system on the market today — engineered to withstand greater upward and downward force from unexpected weather than any other fabric patio awning. This is achieved through the highly specialized and patented Urethane Compression Shoulder Joint, which allows the awning arm to flex as pressure increases from either direction. Built 100% in America with certified wind load ratings, stainless steel hardware, and an exclusive hidden front rail, Sunflexx® delivers lasting performance and unmatched curb appeal.

## KEY FEATURES

- **Patented Urethane Shoulder Joint**  
Arms flex under pressure from any direction — superior wind load performance
- **Certified Wind Load Ratings**  
Engineered and tested for strength beyond standard retractable awnings
- **100% American Manufactured**  
Every component built in the USA for quality, reliability, and fast lead times
- **15-Year Frame Warranty**  
Industry's most comprehensive frame warranty — built to last
- **Exclusive Hidden Front Rail**  
Fabric wraps the front bar — no exposed metal rail contrasting the fabric
- **Motorized or Manual Operation**  
Motors, wind & sun sensors, remote controls, and motion sensors available
